

Sedimentary Facies analysis and classical depositional models

Dr. Domenico Chiarella
Credits: 2 CFU (16 hours)
February 2018

Course Program

21st February

- Basic definitions and concepts
- o Facies analysis
- o Sequence Stratigraphy
- Lithostratigraphic logging
- The plotting of log I
- Exercises

22nd February

- The plotting of log II (continuation)
- Exercises
- The case of mixed siliciclastic-carbonate deposits
